

USB4 2.0 ENGINEERING CHANGE NOTICE FORM

Title: Adding Sideband Inter Symbol Timing Requirement Applied to: USB4 Specification Version 2.0

Brief description of the functional changes:

Adding a maximum time between two Symbols of the same Sideband transaction.

Benefits as a result of the changes:

This will guarantee that a Command transaction won't take too long and might delay a required Response transaction.

An assessment of the impact to the existing revision and systems that currently conform to the USB specification:

None

An analysis of the hardware implications:

None

An analysis of the software implications:

None

An analysis of the compliance testing implications:

Add a general assertion to verify that gap time between Symbols of the same transaction does not pass the maximum value added

USB4 2.0 ENGINEERING CHANGE NOTICE FORM

Actual Change

(a). 4.1.1.2 – Transaction Types

To Text:

An inter-Symbol gap ~~of any duration may be inserted~~ between Symbols of the same Transaction shall be within tInterSBSymbolGap time.

(b). Table 4-72 – Logical Layer Timing Parameters

To Text:

Parameter	Description	Min	Max	Units
tSBInterSymbolGap	The time between the stop bit of a Symbol to the start bit of the following Symbol on the same transaction	--	1	ms
