

# USB4 2.0 ENGINEERING CHANGE NOTICE FORM

**Title: TMU Required on Specific Routers**  
**Applied to: USB4 Specification Version 2.0**

|                                                     |
|-----------------------------------------------------|
| <b>Brief description of the functional changes:</b> |
|-----------------------------------------------------|

|                                                                                                |
|------------------------------------------------------------------------------------------------|
| This ECN adds the requirement to implement TMU on Routers that supports DP, PCIe PTM and USB3. |
|------------------------------------------------------------------------------------------------|

|                                             |
|---------------------------------------------|
| <b>Benefits as a result of the changes:</b> |
|---------------------------------------------|

|                                                                |
|----------------------------------------------------------------|
| Adds clarity about which Routers are required to implement TMU |
|----------------------------------------------------------------|

|                                                                                                                          |
|--------------------------------------------------------------------------------------------------------------------------|
| <b>An assessment of the impact to the existing revision and systems that currently conform to the USB specification:</b> |
|--------------------------------------------------------------------------------------------------------------------------|

|      |
|------|
| None |
|------|

|                                                  |
|--------------------------------------------------|
| <b>An analysis of the hardware implications:</b> |
|--------------------------------------------------|

|      |
|------|
| None |
|------|

|                                                  |
|--------------------------------------------------|
| <b>An analysis of the software implications:</b> |
|--------------------------------------------------|

|      |
|------|
| None |
|------|

|                                                            |
|------------------------------------------------------------|
| <b>An analysis of the compliance testing implications:</b> |
|------------------------------------------------------------|

|                                                       |
|-------------------------------------------------------|
| Need to verify that the required Router implement TMU |
|-------------------------------------------------------|

# USB4 2.0 ENGINEERING CHANGE NOTICE FORM

## Actual Change

### (a). 7 – Time Synchronization

#### To Text:

A Router with one or more Downstream Facing Port shall support the Time Synchronization Protocol described in this chapter. A Router that supports one or more of the following shall support the Time Synchronization Protocol described in this chapter:

- DP tunneling
- USB3 tunneling with exposed USB3 downstream Port(s)
- PCIe tunneling that supports PTM
